POSSIBLE VARIANCES in DATES and DATA

In view of the fact that a wide gap exists between dates and much of the data contained in the Holy Scriptures and those given by secular historians, particularly of very ancient history, it has necessitated a great deal of study and careful thought to be able to judge fairly in such cases, and it is only after the most searching comparisons of numerous authors' works that the dates hereon have been used, which will show at variance with some of the recent writers, who, by the way, fail to agree on a large number of important data.

CENTURY DATES indicating from the center circle numbered 1 to 40 B.C. and 1 to 20 A.D., and corresponding the line numbers given in the index, thus making desired information easily located.

LINE NUMBERS used in the index do not necessarily refer to dates and are used only for greater convenience in locating desired data.

THE INDEX is self-explanatory (See foot note below.)

THE COLOR SCHEME indicates the stock, race or religion to which the individual tribe or nation belongs. (See symbols below.)
