

## In the beginning ...

Before anything existed, there was God. God has no beginning and no end.

Right at the beginning, God created the heavens and the earth, but the earth was empty and had no shape. Then God brought order and spoke things into being; the whole universe, and every living creature – everything our eyes can see and the many things our eyes cannot see.

There are many things around us that are exactly as God made them, like the flowers and animals, and the moon and stars. Other things are made and shaped by people who have used material that God created, like wood and metal (see Hebrews 3:4).

Without God there would be nothing at all, for "Through Him all things were made; without Him nothing was made that has been made" (John 1:3).
