

Star

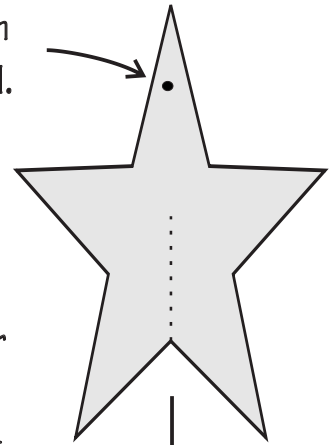

1. Print the star template on card (construction paper).

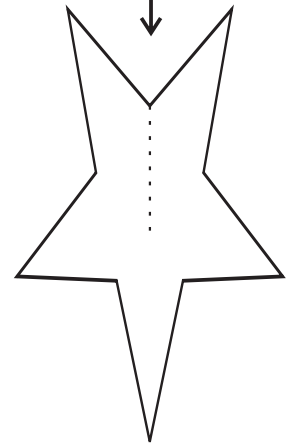

2. Cut out two star shapes. Cut a slit along the dotted line to the center of the star.

3. Make a small hole with a sharp object, like a nail.

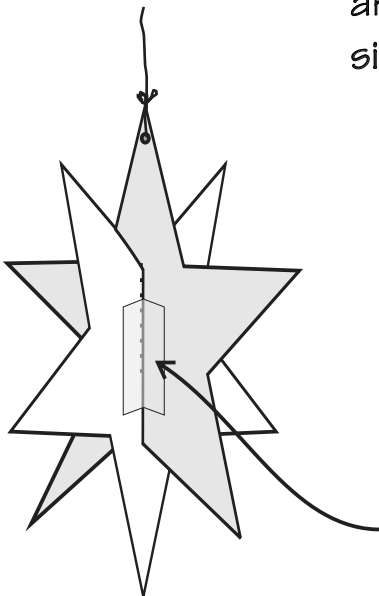

4. Slide the two star shapes into each other at right angles.

5. In order to hang the star, thread a strand of cotton through a hole.

Or bend open a paper clip and use it as a double sided hook.

6. Use small strips of clear tape to secure the two pieces where they join.
